Allowable Subject Matter

1. Claims 1,5-9, 15-19 allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 7, 15, the applicants have presented a persuasive argument, see pages 10-11 of the response, filed on 11/18/2004, that the cited prior art of record fails to disclose or render obvious a plasma processing method wherein when said substrate is etched by the plasma in a plasma generation period, and a change is made in plasma generating condition according to any of said film that are to be etched, said plasma generating condition for stably maintaining generating of the plasma is first changed and thereafter a change is made in said process gas, in combination with the rest of the limitations of claims 1, 7, 15. The closest cited prior art of Hsia et al (US 6,328,848) discloses a plasma processing method wherein when a substrate is etched by the plasma in a plasma generation period, plasma generating condition for stably maintaining generating of the plasma (power, pressure) and process gas are both changed during in same period (col 10, lines 30-40)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
